## Continuing Care Orders for Stable Patients

All patients will have an examination. If they are stable and orders can be followed, they will be. At any time if the patient becomes unstable then orders may be changed. If the primary care veterinarian wishes to be called when changes occur, please note below.

Patient name: \_\_\_\_\_ Client name: \_\_\_\_\_

Primary care DVM: \_\_\_\_\_

Hospital: \_\_\_\_\_

PDVM contact number: \_\_\_\_\_

Do you want to be contacted if orders change? (circle one)      Yes      No

Patient diagnosis: \_\_\_\_\_

Medications	Frequency	Dose	Last Given	Fluids	Rate

Additional diagnostics? \_\_\_\_\_

Additional orders? \_\_\_\_\_

\_\_\_\_\_

Morning orders:

- Send patient back to primary care veterinarian
- Discharge patient to client (please provide discharge instructions)
- Transfer to a specialist: \_\_\_\_\_

Continued care is designed for medically stable patients. Please discuss your orders with the attending emergency clinician for an estimation of charges for orders. A \$30 transfer fee will be charged in addition to treatments administered and hospitalization. Oral medications and fluids, if properly labeled, may be transferred with patient for administration at no additional charge.
