

OUR SERVICES

PRE-OPERATIVE INSTRUCTIONS:

1. If your pet is taking any Aspirin, please discontinue one week prior to the surgical procedure.
2. Discontinue any anti-inflammatory medications (Rimadyl and Deramaxx) 24 hours before surgery.
3. Bring any medications or special diets your pet may be using with you when you drop your pet off for surgery. If you have any questions with regard to any routine medications, please contact your regular veterinarian or the doctor you are seeing here at BluePearl.
4. Your pet may not have a bath for 10-14 days after surgery (until suture removal); therefore, you might want to bathe him/her before surgery.
5. We provide 24-hour care for your pet after surgery; however, you will not be able to call us after 6:00 pm Monday to Friday and after 1:00 pm on Saturday. If there is any change in your pet's condition, we will contact you immediately.
6. Your pet is to have no food after 8 P.M. the evening before surgery, however a little water is o.k.
7. On the day of surgery please bring your pet in between 8-9 am. At that time, you will be given the opportunity to speak with a doctor to discuss the procedure and ask any last-minute questions that you may have. You will also sign the surgical consent forms. At this time a deposit of 75% of the surgical fee is required, with the balance due at the time of discharge.
8. Please Note – The surgery schedule is determined on the day of surgery and is subject to change throughout the day. When your pet's surgery is completed the doctor will call you.

WHAT FORM OF PAYMENTS DO YOU ACCEPT?

We accept the following forms of payment: Cash, Visa, MasterCard, American Express, Discover and Care Credit. All checks are electronically processed, and the check writer must be present with a driver's license. If the check cannot be electronically processed, we will require another form of payment. If you are paying by Credit Card or Care Credit the cardholder must be present with their card and a valid ID.
