IMPORTANT: BluePearl strives for seamless care between your pet and your veterinarian. Please keep the following in mind when considering your pet's needs:

- When calling for medication, please provide two business days to allow our medical team time to review your records. Phone messages, refill requests and email communications are checked daily when your specialty service is in the office. However, please keep in mind BluePearl Philadelphia has no specific pharmacy staff, and medications are often NOT filled during clinical hours while we are caring for our patients.
- Due to increased demand, it is important to schedule your follow-up appointment as soon as possible to ensure availability for your pet to be seen within the recommended time frame.
- For urgent matters, such as a medical emergency or you are concerned your pet's health is declining, please do not rely on email. Instead, have your pet evaluated by a veterinarian. Emails are checked daily during business hours when our internal medicine service is in the office. However, it can take up to three working days to respond to your message. If you have a time-sensitive medical concern for your pet or need medication refills, please call our hospital at 267.800.1950, which is available 24-7.
